

CHIMERA

TYPHON^{AT}

The Chimera TyphonAT tire is specifically designed for today's performance UTVs. With a tread pattern geared to a variety of terrain along with a carcass built for abuse, the TyphonAT is right at home racing in the desert or ripping with your buddies in the high mountains.

- 10pr radial carcass with additional puncture resistant material in the sidewall
- 1k Denier nylon belting and aggressive sidewall lug provide excellent puncture resistance and sidewall strength for more predictable handling.
- High quality rubber compound for improved traction and tread life
- Nylon Belted Radial construction provides flexibility in key areas for maximum offroad traction while maintaining a lightweight performance tire.
- Crown radius tread profile designed for predictable steering in uneven terrain and ruts.
